Subject index

Acetobacter suboxydans
Effects of electric current passing through the fermentation broth of a strain *Acetobacter suboxydans* (Beschkov, Peeva) 185
Adsorption
Voltammetric studies of the adsorption and conformation of polyribocytidylic acid at the mercury electrode surface (Temerk et al.) 77
Aeration
Effects of electric current passing through the fermentation broth of a strain *Acetobacter suboxydans* (Beschkov, Peeva) 185
α helix macrodipoles
A model of amphiphilic-polypeptide-induced hydrophilic pores in membranes of dimyristoylphosphatidylcholine small unilamellar vesicles (Reynaud, Sy) 1
Amphiphilic polypepdides
A model of amphiphilic-polypeptide-induced hydrophilic pores in membranes of dimyristoylphosphatidylcholine small unilamellar vesicles (Reynaud, Sy) 1
Anchorage-independent growth
Enhancement of anchorage-independent growth in JB6 cells exposed to 60 hertz magnetic fields (West et al.) 39
Anthracyclinic antibiotics
Influence of anthracyclinic antibiotics on membranes of human erythrocytes: a combined radiowave electrical conductivity and electron microscopy study (Arancia et al.) 45
Artifical lipid bilayers
Study of LBM interactions with some surface-active substances by the method of capacity minimization (Sužnjević et al.) 19

Bacterial cells
Voltammetric study of the interaction of cadmium with bacterial cells (Agraz et al.) 53
Barley protoplasts
Polymer-supported electrofusion of barley protoplasts: a synergistic effect (Zhang) 109
Bilayer lipid membranes
Nonlinearity of current-voltage characteristics of the gramicidin channel and the structure of gramicidin molecule (Hianik et al.) 61
Bilirubin
In-situ UV–visible spectroelectrochemical and circular dichroic electrochemical study of bilirubin and bilirubin + human serum albumin complex (Cheng et al.) 141
Bioassay system
Electrochemical bioassay system. Redox measurements of *Escherichia coli* growth by multichannel analyzer (Silva, Wong) 177
Bioelectrochemistry
Electrochemical bioassay system. Redox measurements of *Escherichia coli* growth by multichannel analyzer (Silva, Wong) 177
Biological membranes
A model of amphiphilic-polypeptide-induced hydrophilic pores in membranes of dimyristoylphosphatidylcholine small unilamellar vesicles (Reynaud, Sy) 1
Biomass growth
Effects of electric current passing through the fermentation broth of a strain *Acetobacter suboxydans* (Beschkov, Peeva) 185
Biosynthetic polynucleotides
Voltammetric studies of the adsorption and conformation of polyribocytidylic acid at the mercury electrode surface (Temerk et al.) 77

Cadmium
Voltammetric study of the interaction of cadmium with bacterial cells (Agraz et al.) 53
Capacity minimization
Study of LBM interactions with some surface-active substances by the method of capacity minimization (Sužnjević et al.) 19
Carbon paste electrode
Amperometric biosensor based on carbon paste mixed with enzyme, lipid and cytochrome *c* (Amine et al.) 123
Catechol metabolism
Cyclic voltammetric oxidation of L-dopa at polycarbazole-modified electrode: evaluation of the cyclization rate constant (Kawde et al.) 83
Cell alignment
Paired cell alignment using a jagged microarray electrode (Matsumoto et al.) 199
Cell division
Systemic reaction of *Escherichia coli* cells to weak electromagnetic fields of extremely low frequency (Alipov et al.) 5
Cell morphology
Influence of anthracyclinic antibiotics on membranes of human erythrocytes: a combined radiowave electrical conductivity and electron microscopy study (Arancia et al.) 45
Cheesecloth
Potentiometric studies at the glucose oxidase enzyme electrode (Kumar et al.) 195
Chelating agents
Modification of electroporative response of erythrocytes by EDTA in isotonic solutions (Nanda, Mishra) 189
Cholesterol
Nonlinearity of current-voltage characteristics of the gramicidin channel and the structure of gramicidin molecule (Hianik et al.) 61
Conformation
Voltammetric studies of the adsorption and conformation of polyribocytidylic acid at the mercury electrode surface (Temerk et al.) 77
Current-voltage characteristics
Nonlinearity of current-voltage characteristics of the gramicidin channel and the structure of gramicidin molecule (Hianik et al.) 61
Cyclic voltammetric oxidation
Cyclic voltammetric oxidation of L-dopa at polycarbazole-modified electrode: evaluation of the cyclization rate constant (Kawde et al.) 83

Cyclic voltammetry
Electrochemical study of the nitro radical anion from nicardipine: kinetic parameters and its interaction with glutathione (Squella et al.) 13
Cyclic voltammetry with RNA-modified mercury electrode (Fojta et al.) 69
Cyclization rate constant
Cyclic voltammetric oxidation of L-dopa at polycarbazole-modified electrode: evaluation of the cyclization rate constant (Kawde et al.) 83
Cyclocytidine
Electrochemical behaviour of cyclocytidine: kinetics of its hydrolytic transformation to cytarabine (Marín, Teijeiro) 25
Cytarabine
Electrochemical behaviour of cyclocytidine: kinetics of its hydrolytic transformation to cytarabine (Marín, Teijeiro) 25
Cytochrome *C*
Electrochemical reaction of cytochrome *c* at gold electrodes modified with thiophene containing one functional group (Qu et al.) 153

Dextran
Polymer-supported electrofusion of barley protoplasts: a synergistic effect (Zhang) 109
Dielectrophoresis
Paired cell alignment using a jagged microarray electrode (Matsumoto et al.) 199
DNA synthesis
Systemic reaction of *Escherichia coli* cells to weak electromagnetic fields of extremely low frequency (Alipov et al.) 5
Drug adsorption
Study of LBM interactions with some surface-active substances by the method of capacity minimization (Sužnjević et al.) 19

EDTA
Modification of electroporative response of erythrocytes by EDTA in isotonic solutions (Nanda, Mishra) 189
Elasticity
Deformation of a lipid vesicle in an electric field: a theoretical study (Sokirko et al.) 101
Electrical fields
Electromediated permeabilization of frog skeletal muscle cell membrane: effect of voltage-gated ion channels (Chen, Lee) 157
Electrical haemolysis
Studies on electroporation of thermally and chemically treated human erythrocytes (Nanda, Mishra) 129
Electrical injury
Electromediated permeabilization of frog skeletal muscle cell membrane: effect of voltage-gated ion channels (Chen, Lee) 157
Electric current effects
Effects of electric current passing through the fermentation broth of a strain *Acetobacter suboxydans* (Beschkov, Peeva) 185
Electric field
A model of amphiphilic-polypeptide-induced hydrophilic pores in membranes of dimyristoylphosphatidylcholine small unilamellar vesicles (Reynaud, Sy) 1
Electric field effects
Voltammetric studies of the adsorption and conformation of polyribocytidylic acid at the mercury electrode surface (Temerk et al.) 77
Deformation of a lipid vesicle in an electric field: a theoretical study (Sokirko et al.) 101
Electrochemical potential
Nonlinearity of current-voltage characteristics of the gramicidin channel and the structure of gramicidin molecule (Hianik et al.) 61
Electrofusion
Membrane electrofusion yields in membrane fractions obtained with a colloid-osmotic hemolysis and electrohemolysis procedure (Abidor et al.) 31
Design, synthesis and application of surface-active chemicals for the promotion of electrofusion of plant protoplasts (Hoffmann-Tsay et al.) 115
Electrohemolysis
Membrane electrofusion yields in membrane fractions obtained with a colloid-osmotic hemolysis and electrohemolysis procedure (Abidor et al.) 31
Electron transfer
Electrical oscillations across polypyrrole membranes caused by electron donors and electron acceptors (Iseki et al.) 149
Electrochemical reaction of cytochrome *c* at gold electrodes modified with thiophene containing one functional group (Qu et al.) 153
Electro-oxidation
In-situ UV–visible spectroelectrochemical and circular dichroic electrochemical study of bilirubin and bilirubin + human serum albumin complex (Cheng et al.) 141
Electropermeabilization
Modification of electroporative response of erythrocytes by EDTA in isotonic solutions (Nanda, Mishra) 189
Electroporation
Membrane electrofusion yields in membrane fractions obtained with a colloid-osmotic hemolysis and electrohemolysis procedure (Abidor et al.) 31
Studies on electroporation of thermally and chemically treated human erythrocytes (Nanda, Mishra) 129
Electromediated permeabilization of frog skeletal muscle cell membrane: effect of voltage-gated ion channels (Chen, Lee) 157
Modification of electroporative response of erythrocytes by EDTA in isotonic solutions (Nanda, Mishra) 189
ELF magnetic fields
Enhancement of anchorage-independent growth in JB6 cells exposed to 60 hertz magnetic fields (West et al.) 39
Enzyme electrode
Potentiometric studies at the glucose oxidase enzyme electrode (Kumar et al.) 195
Erythrocytes
Membrane electrofusion yields in membrane fractions obtained with a colloid-osmotic hemolysis and electrohemolysis procedure (Abidor et al.) 31
Escherichia coli growth
Electrochemical bioassay system. Redox measurements of *Escherichia coli* growth by multichannel analyzer (Silva, Wong) 177

Fermentation broth
Effects of electric current passing through the fermentation broth of a strain *Acetobacter suboxydans* (Beschkov, Peeva) 185

Glucose oxidase
Potentiometric studies at the glucose oxidase enzyme electrode (Kumar et al.) 195
Glutathione
Electrochemical study of the nitro radical anion from nicardipine: kinetic parameters and its interaction with glutathione (Squella et al.) 13
Gramicidin
Nonlinearity of current-voltage characteristics of the gramicidin channel and the structure of gramicidin molecule (Hianik et al.) 61

Human erythrocyte membranes
Influence of anthracyclinic antibiotics on membranes of human erythrocytes: a combined radiowave electrical conductivity and electron microscopy study (Arancia et al.) 45
Human erythrocytes
Studies on electroporation of thermally and chemically treated human erythrocytes (Nanda, Mishra) 129
Modification of electroporative response of erythrocytes by EDTA in isotonic solutions (Nanda, Mishra) 189
Human serum albumin
In-situ UV–visible spectroelectrochemical and circular dichroic electrochemical study of bilirubin and bilirubin + human serum albumin complex (Cheng et al.) 141
Hydrogen generation
Electrochemical bioassay system. Redox measurements of *Escherichia coli* growth by multichannel analyzer (Silva, Wong) 177
Hydrolysis
Hydrolytic activity of phospholipase D from plants and *Streptomyces* spp. against phosphatidylcholine monolayers at the polarized oil|water interface (Kondo et al.) 93
Hydrolytic transformation
Electrochemical behaviour of cyclocytidine: kinetics of its hydrolytic transformation to cytarabine (Marín, Teijeiro) 25
Hydrophilic pores
A model of amphiphilic-polypeptide-induced hydrophilic pores in membranes of dimyristoylphosphatidylcholine small unilamellar vesicles (Reynaud, Sy) 1

Ion channels
Electromediated permeabilization of frog skeletal muscle cell membrane: effect of voltage-gated ion channels (Chen, Lee) 157
Ion transfer
Electrical oscillations across polypyrrole membranes caused by electron donors and electron acceptors (Iseki et al.) 149

JB6 cells
Enhancement of anchorage-independent growth in JB6 cells exposed to 60 hertz magnetic fields (West et al.) 39

Lactate dehydrogenase
Amperometric biosensor based on carbon paste mixed with enzyme, lipid and cytochrome *c* (Amine et al.) 123
Lactate dehydrogenases
Ruthenium complexes as redox mediators for malate and lactate dehydrogenases (Rivera et al.) 169
Langmuir–Blodgett films
Control of protein orientation in molecular photoelectric devices using Langmuir–Blodgett films of photosynthetic reaction centers from *Rhodopseudomonas viridis* (Yasuda et al.) 135
L-dopa
Cyclic voltammetric oxidation of L-dopa at polycarbazole-modified electrode: evaluation of the cyclization rate constant (Kawde et al.) 83

Malate dehydrogenase
Ruthenium complexes as redox mediators for malate and lactate dehydrogenases (Rivera et al.) 169
Mercury electrode
Voltammetric studies of the adsorption and conformation of polyribocytidylic acid at the mercury electrode surface (Temerk et al.) 77
Metal–micro-organism interactions
Voltammetric study of the interaction of cadmium with bacterial cells (Agraz et al.) 53
Microarray electrode
Paired cell alignment using a jagged microarray electrode (Matsumoto et al.) 199
Molecular photoelectric devices
Control of protein orientation in molecular photoelectric devices using Langmuir–Blodgett films of photosynthetic reaction centers from *Rhodopseudomonas viridis* (Yasuda et al.) 135
Mouse myeloma
Paired cell alignment using a jagged microarray electrode (Matsumoto et al.) 199
Multichannel analyser
Electrochemical bioassay system. Redox measurements of *Escherichia coli* growth by multichannel analyzer (Silva, Wong) 177

Nicardipine
Electrochemical study of the nitro radical anion from nicardipine: kinetic parameters and its interaction with glutathione (Squella et al.) 13
Nitro radical
Electrochemical study of the nitro radical anion from nicardipine: kinetic parameters and its interaction with glutathione (Squella et al.) 13
Nucleic acid analysis
Cyclic voltammetry with RNA-modified mercury electrode (Fojta et al.) 69

Oil|water interface
Hydrolytic activity of phospholipase D from plants and *Streptomyces* spp. against phosphatidylcholine monolayers at the polarized oil|water interface (Kondo et al.) 93
Osmolarity
Polymer-supported electrofusion of barley protoplasts: a synergistic effect (Zhang) 109
Osmotic hemolysis
Membrane electrofusion yields in membrane fractions obtained with a colloid-osmotic hemolysis and electrohemolysis procedure (Abidor et al.) 31

Phosphatidylcholine monolayer
Hydrolytic activity of phospholipase D from plants and *Streptomyces* spp. against phosphatidylcholine monolayers at the polarized oil|water interface (Kondo et al.) 93
Phospholipase D
Hydrolytic activity of phospholipase D from plants and *Streptomyces* spp. against phosphatidylcholine monolayers at the polarized oil|water interface (Kondo et al.) 93
Phospholipids
Study of LBM interactions with some surface-active substances by the method of capacity minimization (Sužnjević et al.) 19
Photosynthetic reaction centers
Control of protein orientation in molecular photoelectric devices using Langmuir–Blodgett films of photosynthetic reaction centers from *Rhodopseudomonas viridis* (Yasuda et al.) 135
Plant protoplasts
Design, synthesis and application of surface-active chemicals for the promotion of electrofusion of plant protoplasts (Hoffmann-Tsay et al.) 115
Plants
Hydrolytic activity of phospholipase D from plants and *Streptomyces* spp. against phosphatidylcholine monolayers at the polarized oil|water interface (Kondo et al.) 93
Polycarbazole-modified electrode
Cyclic voltammetric oxidation of L-dopa at polycarbazole-modified electrode: evaluation of the cyclization rate constant (Kawde et al.) 83

Polycarbonate film
Electrical oscillations across polypyrrole membranes caused by electron donors and electron acceptors (Iseki et al.) 149
Polymer-supported electrofusion
Polymer-supported electrofusion of barley protoplasts: a synergistic effect (Zhang) 109
Polypyrrole membranes
Electrical oscillations across polypyrrole membranes caused by electron donors and electron acceptors (Iseki et al.) 149
Polyribocytidylic acid
Voltammetric studies of the adsorption and conformation of polyribocytidylic acid at the mercury electrode surface (Temerk et al.) 77
Pore resealing
Membrane electrofusion yields in membrane fractions obtained with a colloid-osmotic hemolysis and electrohemolysis procedure (Abidor et al.) 31
Potential oscillations
Electrical oscillations across polypyrrole membranes caused by electron donors and electron acceptors (Iseki et al.) 149
Potentiometric response
Potentiometric studies at the glucose oxidase enzyme electrode (Kumar et al.) 195
Protein orientation control
Control of protein orientation in molecular photoelectric devices using Langmuir–Blodgett films of photosynthetic reaction centers from *Rhodopseudomonas viridis* (Yasuda et al.) 135
Protein synthesis
Systemic reaction of *Escherichia coli* cells to weak electromagnetic fields of extremely low frequency (Alipov et al.) 5

Radiowave electrical conductivity
Influence of anthracyclinic antibiotics on membranes of human erythrocytes: a combined radiowave electrical conductivity and electron microscopy study (Arancia et al.) 45
Reaction kinetics
Electrochemical study of the nitro radical anion from nicardipine: kinetic parameters and its interaction with glutathione (Squella et al.) 13
Redox mediators
Ruthenium complexes as redox mediators for malate and lactate dehydrogenases (Rivera et al.) 169
Redox potential
Electrochemical bioassay system. Redox measurements of *Escherichia coli* growth by multichannel analyzer (Silva, Wong) 177
Rhodopseudomonas viridis
Control of protein orientation in molecular photoelectric devices using Langmuir–Blodgett films of photosynthetic reaction centers from *Rhodopseudomonas viridis* (Yasuda et al.) 135
RNA-modified electrode
Cyclic voltammetry with RNA-modified mercury electrode (Fojta et al.) 69
Ruthenium complexes
Ruthenium complexes as redox mediators for malate and lactate dehydrogenases (Rivera et al.) 169

Small unilamellar vesicles
A model of amphiphilic-polypeptide-induced hydrophilic pores in membranes of dimyristoylphosphatidylcholine small unilamellar vesicles (Reynaud, Sy) 1
Spectroelectrochemistry
In-situ UV–visible spectroelectrochemical and circular dichroic electrochemical study of bilirubin and bilirubin + human serum albumin complex (Cheng et al.) 141
Streptomyces spp.
Hydrolytic activity of phospholipase D from plants and *Streptomyces* spp. against phosphatidylcholine monolayers at the polarized oil|water interface (Kondo et al.) 93
Structural defects
A model of amphiphilic-polypeptide-induced hydrophilic pores in membranes of dimyristoylphosphatidylcholine small unilamellar vesicles (Reynaud, Sy) 1
Surface-active chemicals
Design, synthesis and application of surface-active chemicals for the promotion of electrofusion of plant protoplasts (Hoffmann-Tsay et al.) 115
Surfactants
Design, synthesis and application of surface-active chemicals for the promotion of electrofusion of plant protoplasts (Hoffmann-Tsay et al.) 115
Synergy
Polymer-supported electrofusion of barley protoplasts: a synergistic effect (Zhang) 109

Temperature
Studies on electroporation of thermally and chemically treated human erythrocytes (Nanda, Mishra) 129
Thiol reactive agents
Studies on electroporation of thermally and chemically treated human erythrocytes (Nanda, Mishra) 129
Thiophene-modified Au electrode
Electrochemical reaction of cytochrome *c* at gold electrodes modified with thiophene containing one functional group (Qu et al.) 153
Trace metals
Voltammetric study of the interaction of cadmium with bacterial cells (Agraz et al.) 53

Vesicle deformation
Deformation of a lipid vesicle in an electric field: a theoretical study (Sokirko et al.) 101
Vesicle model
Deformation of a lipid vesicle in an electric field: a theoretical study (Sokirko et al.) 101
Voltage clamp
Electromediated permeabilization of frog skeletal muscle cell membrane: effect of voltage-gated ion channels (Chen, Lee) 157
Voltammetric titration curves
Voltammetric study of the interaction of cadmium with bacterial cells (Agraz et al.) 53
